XBFP256	Big Fork - Polished	Front fork for rear wheel.	Replace your normal front-wheel for a rear wheel to conquer rough terrain. Some people use it as an performance item, because of the extra grip on tarmac.	672,75	195	
XDE0201	Deuce (two handed sailing)	Stainless Steel to connect 2 blokarts	With the deuce you can connect as many blokarts as you want, replace the keel vvoor the deuce and hook to the blokart in front of you, and off you go! You can even sail the second kart without a sail!	862,50	250	
XWH0201	Disc Brake Set	Disc brake for front wheel.	Stop!...You can now. The blokart disc brake has been developed to assist slowing and stopping. Ideal for when you are sharing a parkinglot with vehicles. Adjusters on either side of the caliper allow for easy tuning. The quick release brake lever also features a unique parking brake.	431,25	125	
BLO0200	Electric Motor	500 watt electric hub motor	The engineers at blokart have been working with an electric motor manufacturer to develop a hub motor for the blokart so they can be used promotionally in parades, events and demonstrations. The blokart front wheel was exchanged for an aluminium mag wheel of the same size fitted with a 500 watt electric hub motor. Pivots for a Vee Brake system were fitted to the purpose built forks. The left hand brake lever is fitted with a sensor which cuts the power to the front wheel to ensure the throttle is off under braking. A nice thumb throttle with a kill button and an LED battery power indicator is mounted on the right handlebar. The 36 volt battery is in a strong alloy case with an ignition key and is positioned in a p urpose built bag behind the blokart seat with the systems controller in a small bag fitted to the side strut of the kart. The system is pleasantly powerful and instantly puts a smile on the driver face. It has so much torque that the front wheel easily spins at full throttle on the grass. Small inclines are not a problem. With only a small amount of friction in the front wheel when the throttle is off the electric system can certainly be used in combination with sailing. The e-blokart kit is excellent for ~getting out of the hole™ on very light days. When coming to a stop, a short 5 second burst of power can exceleerate the kart to a speed that can can be maintained with the sail using the apparent wind. The small amount of friction from the front wheel is a small sacrifice for this huge benefit.		NOT DEFINED	
XFB0201	Foot Bar Extension	Stainless steel foot bar	This clever device allows those with long legs to fit comfortably in a blokart without being cramped. If you are 1,90+ this accessory is for you. Alternatively, a Pod also offers more leg-room along with other advantages- warmer, dryer faster!	296,70	86
